

Sprint 3 Report: The Starving Slug 3/04/2018

- Actions to stop doing:
 - The team has been keeping each other posted on what's going on, so we don't see any actions that we need to stop doing. We were able to accomplish much more this sprint with midterms being finished. Meeting more often to have coding sessions and explaining to each other the different backend and frontend components have also been really helpful.
- Actions to start doing:
 - Make an updated layout of the UI
 - Make designs and coding consistent
 - Testing for frontend
- Actions to keep doing:
 - The team should keep team members posted on what you're doing through Slack. This gives an idea on how much work everyone has done.
 - The team should keep on having coding sessions.
- Work completed:
 - Integrate Google Identity on backend
 - Connect backend and frontend for creating recipes
 - Update recipe for backend
 - Save bookmarked recipes to user
 - Backend half of recipe search
 - Search page layout
 - Frontend for rating and commenting system
 - Some testing for the backend
- Work not completed:
 - Backend integration for search page and rating/comment system
- Work completion rate:
 - Total number of user stories completed: 3
 - Total number of estimated ideal work hours: 30
 - Total number of days during the sprint: 14
