

Sprint 1 Report: The Starving Slug 2/4/2018

- Actions to stop doing:
 - The team is satisfied with the current actions we are taking. While there are actions that the team needs to start taking, we do not see the need to stop any actions that we are taking now. Meetings are productive and everyone is completing their work on time. There have been no major problems with the tasks assigned to the sprint.
- Actions to start doing:
 - The team should start making feature branches to avoid merge conflicts. Feature branches also help organize the project and does not mess with the main project before the feature is finished.
 - In addition to the meeting on Monday, the team should start having meetings (online or in-person) on Wednesday and Friday. These additional meetings will give team members a better idea on what everyone is doing.
- Actions to keep doing:
 - The team should keep team members posted on what you're doing through Slack. This gives an idea on how much work everyone has done.
 - The team should keep on assigning reasonable goals to each sprint. Work stays efficient and team morale is kept high when tasks can be completed on time.
- Work completed:
 - Create Google login with email and password.
 - Create sidebar menu for the profile page.
 - Create database with MongoDB.
 - Create recipe page
 - Create profile page with a beautiful design.
 - Host Node-js backend and MongoDB in Google Cloud Platform
 - Host front-end.
 - Host multiple domains.
 - Navigate easily from page to page.
- Work not completed:
 - None
- Work completion rate:
 - Total number of user stories completed: 3
 - Total number of estimated ideal work hours: 30
 - Total number of days during the sprint: 14
